9. GO-TO-MARKET ROADMAP

Product Vision

Social Optimize is an AI-powered video content factory. One prompt creates a full video with script, voiceover, music, visuals, and captions - then publishes to 8+ platforms. It replaces a \$5,000/mo content team with a \$29-199/mo subscription.

Target Audiences (by adoption phase)

EARLY ADOPTERS (Mo 1-6, 5-160 users):

- Solo content creators struggling to post consistently
- Small business owners (restaurants, realtors, fitness coaches) who know they need video but can't afford editors
- Side-hustle creators testing TikTok/YouTube Shorts
- Marketing freelancers looking for an edge

GROWTH PHASE (Mo 7-12, 320-10K users):

- Social media managers at SMBs (manage 3-10 accounts)
- E-commerce brands needing product videos at scale
- Real estate agents (listing videos, market updates)
- Course creators and coaches needing promo content
- Marketing agencies serving multiple clients

SCALE PHASE (Mo 13-24, 10K-1M users):

- Enterprise marketing teams (consistent brand content)
- Media agencies (white-label video production)
- SaaS companies (demo videos, onboarding)
- Healthcare/education (patient/student content)
- International creators (localized content)

Use Cases That Drive Adoption

1. DAILY SOCIAL POSTING - Creator types a topic, gets a ready-to-post video in 2 min. This is the core hook.
2. BATCH CONTENT - Agency creates 20 videos for 5 clients in one afternoon. This is the Agency tier driver.
3. REPURPOSING - One idea becomes a TikTok, YouTube Short, IG Reel, and LinkedIn post. Multi-platform is the moat.
4. TREND RIDING - AI monitors trends, suggests topics, auto-creates timely content. Keeps users engaged.
5. BRAND ADS - Commercial Studio creates professional ads. Upsells free users to paid.

Adoption Strategy by Phase

PHASE 1-2: ORGANIC PULL (Mo 1-4)

- ProductHunt launch + social proof
- App generates its own demo content (eats own dog food)
- Free tier with watermark = viral distribution
- NPS-driven iteration: fix top 3 complaints weekly
- Target: 80 users, first 12 paying

PHASE 3: PAID IGNITION (Mo 5-8)

- \$200-500/mo ad spend on winning creatives
- Niche landing pages: 'AI videos for realtors', 'AI videos for restaurants'
- Affiliate deals with micro-influencers (20% recurring)
- Viral loop: 'Made with Social Optimize' watermark drives signups
- Target: 640 users, \$14K MRR

PHASE 4: CHANNEL DIVERSIFICATION (Mo 9-12)

- Mobile app launch (React Native)
- Weekly webinars as lead gen funnel
- SEO content machine (50 YouTube tutorials)
- Template marketplace (users sell to users)
- Localization (4 languages)
- Target: 10,000 users, \$223K MRR

PHASE 5-6: SCALE MACHINE (Mo 13-24)

- \$15K-500K/mo marketing budget (15-20% of MRR)
- Enterprise outbound sales team
- Strategic partnerships (Canva, Shopify, Notion)
- International expansion (LATAM, Asia)

- Conference sponsorships (VidCon, Creator Economy)
- White-label for agencies
- Target: 1M users, \$22.3M MRR

Competitive Moat

1. FULL PIPELINE - Competitors do one thing (CapCut=editing, Opus Clip=clipping). We do script->shoot->edit->publish.
2. MULTI-PLATFORM - One click publishes to TikTok, YouTube, IG, LinkedIn, X, Facebook, Pinterest, Snapchat.
3. AI AGENTS - Hollywood Studio, Music Studio, Commercial Studio - specialized AI workflows competitors don't have.
4. SELF-MARKETING - The app markets itself by generating its own ads. Zero marginal marketing cost.
5. AGENCY TOOLS - CRM, client management, white-label - no competitor serves agencies this way.
